

Select text. Poof. Jira ticket.

Create perfect Jira tickets from any text in your browser.
In 5 seconds. Powered by AI.

How it works

01

Install Poof

Add Poof to Chrome from the Chrome Web Store. Click the Poof icon in your toolbar to open Settings.

02

Connect Jira

Enter your Jira workspace URL, email, and API token. Poof will automatically fetch your projects.

03

Select any text

Highlight text from any webpage — email, Slack, Confluence, PDF, or anywhere in Chrome.

04

Right-click → Poof

Right-click the selected text and choose "Create Jira ticket with Poof" from the context menu.

05

Review & create

AI generates the ticket with title, description, type and priority. Edit if needed, then click Create.

Key features

◆ AI-powered ticket generation

Claude AI analyzes your selected text and automatically fills in the title, description, issue type, and priority.

◆ Manual mode

Skip AI and create tickets manually. Manual tickets don't count toward your free limit.

◆ Multi-project support

Switch between Jira projects directly in the popup. Set a default project in Settings.

◆ File attachments

Attach up to 3 files per ticket — screenshots, PDFs, logs, videos. Files upload directly to Jira.

◆ Regenerate

Not happy with the AI result? Hit Regenerate to get a fresh ticket without closing the popup.

◆ Light & Dark mode

Switch between light and dark themes. Your preference is saved automatically.
